

VOTE HEALTH CARE ELECTION 2025

Ask Your Candidates Where They Stand

Health care is one of the top concerns for Canadians, and with good reason. Our public Medicare system is facing increasing threats—privatization, funding shortfalls, and workforce shortages.

This election, the Canadian Health Coalition is urging voters to ask candidates about their commitment to protecting and strengthening public health care by pressing them on three key health care issues:

Medicare

Will you and your party ensure public health care is provided to everyone in Canada based on their medical need, not their ability to pay, by championing our cherished single-payer, universal Medicare system?

Pharmacare

Will you and your party work with provinces and territories to provide free contraceptives, diabetes treatments, and other types of prescription medication to everyone in Canada through the new national universal pharmacare program?

Dental Care

Will you and your party make the Canadian Dental Care Plan conform with universal Medicare by extending free dental coverage to everyone in Canada regardless of their age, household income, or private insurance coverage?

How You Can Help:

- » **Scan the QR code** to send these questions directly to your local candidates.
- » **Share this handout** with friends, family, and your community.
